**First workshop on**

Model-Driven Software Development Today

co-located with Software Engineering 2007

Hamburg, 29th of March 2007, 14:00 - 17:00

http://www.se2007.de/
http://mdsd07.techjava.de/

Goals

The main goal of the workshop is the establishment of interconnections between professionals in the area of model-driven software development. The collaboration in the MDSD community aims at increasing knowledge exchange between research and industry. The future growth in the area depends on the results of individual community members. Therefore the exchange within the community and discovery of research trends is an important goal of this workshop.

Target audience

Young professionals in area of MDSD from the industry
Students / ph.d students / postdocs interesting in MDSD
Senior professionals of the MDSD Community

Program

Oliver Ihns (Holisticon AG)	MDSD in EJB3 (invited talk)
Helge Klimek (TUHH)	Building Graphical Editors using GMF Technology
Miguel Garcia (TUHH)	Generation of DSL Tools based on Language Definitions
Thomas Büchner (TU München)	Introspective Model-Driven Development (invited talk)
Boris Gruschko (SAP Research)	Model Driven Software Evolution
Oliver Alt (Robert Bosch GmbH)	Modelltransformation mit der QVT Relationssprache
Thorsten Pohl (Lufthansa Technik AG)	Model-to-Modeltransformationen in AndroMDA 4 - ein Überblick

Program committee

Prof. Dr. Friedrich H. Vogt	TUHH
Prof. Dr. Ralf Moeller	TUHH
Prof. Dr. Volker Turau	TUHH
Matthias Witt	TUHH
Christoph Weyer	TUHH
Simon Zambrovski	TUHH
Boris Gruschko	SAP Research
Peter Friese	Gentleware
Markus Völter	völter - ingenieurbüro für softwaretechnologie
Oliver Ihns	Holisticon AG
Horst Duchene	DB Systems GmbH
